Notes: Telephone Conversation Dated:

3/15/13- I received a call from Ed Spears (CMPA) and Mandy Bills of the City of Pensacola relative to our "public records request" for information pertinent to the Community Maritime Park (CMP) complex. Mr. Spears expressed concern about the volume of work required to comply with our request. He stated that it would involve extensive hours of effort to research all the e-mails concerning the CMP and that it would cost tens of thousands of dollars at his hourly rate. I indicated that I would apprise Mr. Jones and our counsel about his concerns. I expressed that our sole intent was to gather needed and previously requested information on the CMP so that we could make an informed decision(s) on how to proceed with the CMP assessment decision(s). I apprised them that our purpose was statutory and that we were required by law to document the CMP improvements. I assured him that no decision had been made on any taxation issue(s).
