\$244,150 it was a crap year  
Original way total \$36,000  
Dan/Hank way \$45,000  
The way I re-wrote and we signed for \$24,000 total but paid \$5k owe \$19k  
All totals are after the \$60k was taken out from the unrestricted larger percentage side.

All right I submitted to them what you sent me via text. I did can change around your wordage since you had sent that to me with the explanation of the payout. Just in case anybody calls you and asked you. I will forward back to you what I sent them so you at least had that.

\$244,150 total for year 10/2021-9/2022

Original way total \$36,000 owed to her on the above annual total (her initial agreement when hired in 2020)

Dan/Hank way \$45,000 owed to her (if we followed what those two submitted)

The way Manda re-wrote and we signed for - \$24,000 total but paid \$5k (already paid her from first quarter submission) \$19k - is owed her for calendar year.

All totals are after the \$60k (her annual salary) was taken out from the unrestricted larger percentage side.

My understanding is the reason why this was even mentioned when she was hired is because she was looking closer to 90,000 and this was the way to supply her with that extra income based on how much she brought in. So with her annual salary of 60,000 and in the calendar year she's now earn an extra 24,000 that gets her to that 84,000 which is, closer to that 90,000. That's a lot of number so let me know if you're confused. 😊

Thanks, hopefully moving forward all is good.  
If he needs to talk to me he can call whenever. Maj and I are going to trivia at stripes later. I'll have my phone.  
Side note those totals are if everything I was told comes before Oct 1.  
State money and donor bequeath are pending.  
Bequeath was verified they sent.  
State, who knows.

I know I just wanted them to see that what you had done in a sense of saving us money. So that's why I kind of redid it the way I did just to make it from my viewpoint not just yours.
